Career Objective

A motivated and detail-oriented undergraduate with a strong foundation in software development, data science, and web technologies, seeking an entry-level role in Computer Science / IT where I can apply my programming, problem-solving, and analytical skills in a dynamic and growth-oriented environment.

Technical Skills

Programming Languages: C, C++, Java, Python

Web Technologies : HTML, CSS, SQL

Data Science & Machine Learning : Data preprocessing and analysis

Tools & Platforms : Basic proficiency in MATLAB, Git, Linux, MS Office, and LaTeX.

Operating Systems: Windows, Linux (Basic)

Networking & Security Basics : DNS concepts, firewall fundamentals, and antivirus security awareness

Academic Projects

1. Mini Project: PowerPoint Control Using Hand Gestures

Built a computer vision system using Python and OpenCV to control PowerPoint slides through real-time hand gesture recognition, reducing reliance on mouse and keyboard.

2. Major Project: Low Dropout Voltage (LDO) Regulator Design

Designed and analyzed a CMOS-based Low Dropout (LDO) Voltage Regulator for low-power applications.

3. Hotel Management System

Developed a web-based room booking system using HTML, CSS, and SQL, enabling online reservations and basic database management.

4. Prison Management System

Created a database-driven application to manage inmate and prison records with CRUD operations and data sorting functionalities.

5. Spam Mail Prediction (AI/ML Project)

Developed an AI/ML-based spam email prediction system using Python and data science techniques to improve email filtering accuracy.
